ECL® (EXTENDED CODEX LABEL) SOLUTIONS

TYPICAL PRODUCTS

All multi layer label structures with fold out or 'opens as a book' construction, which multiplies the amount of displayed information comparing to the traditional self-adhesive stickers.

TYPICAL TECHNICAL RESOURCES

- Existing production equipment of the other business units, shared in accordance with the requirements
- Traditional and UV-dried sheet-fed offset printing machines, each with in-line die-cutting units for the precise and economical configuration of the opening tab
- Folding machines with in-line gluing units (smallest fold: 15 mm)
- 4 ECL label production machine with flexo units, UV driers, laminating unit, labelling unit, stamping units, and a hot-melt gluing unit
- 3 Conventional and with full (100 %) camera control equipped converting machines

CUSTOMERS

All companies that wish to provide more extensive information for their products in the form of a self-adhesive label, and/or require this for compliance with legal regulations, and/or in order to integrate several language mutations into a single label.

The use of ECL® provides possibilities to increase sales, to use new types of marketing and packaging solutions, to increase customer confidence, and in certain cases to reduce logistical expenses. Codex Zrt currently produces ECL® products and solutions for 14 different industries.

AWARDS AND HONORS
